

## **.NET Developer**

Adecco Information Technology connects the best IT experts with the right job opportunities in leading IT companies. We are a team of dedicated consultants specialized in providing recruitment and HR services in the IT industry. For our client, a British-Canadian company developing software in the finance industry, we are looking for experienced .NET developers to join their development team in Belgrade.

### **Main responsibilities:**

- Building/implementing using the latest technologies in the development environment
- Working on critical projects to help meet deadlines
- Writing WCF Services
- Working in Microsoft SQL Databases

### **Requirements:**

- Expert .NET (C# highly preferred) Web application development skills
- Understanding of Linq queries
- Understanding of responsive web design concepts
- Understanding of cyber security best practices (SSL encryption configuration/enforcement, .NET security)
- Understanding and experience setting up web applications on IIS
- Strong knowledge of front-end technologies (HTML5, CSS3, jQuery)
- Experience with Windows Server technology

### **Candidate profile:**

- Self-motivated and results-oriented
- Energetic and ambitious
- Problem-solving and analytical approach
- Team-oriented, with strong communication skills
