

SENIOR JAVA DEVELOPER

Adecco Information Technology connects the best IT experts with the right job opportunities in leading IT companies. We are a team of dedicated consultants specialized in providing recruitment and HR services in the IT industry. For our client, a US-based company developing their own product in the car service industry, we are looking for Senior Java developers to join their team based in Belgrade.

Experience consuming and/or building RESTful APIs:

- Demonstrable experience building enterprise quality services
- Experience with test automation and test driven development
- Bachelor's degree in Computer Science or a related discipline

Ideally, skills and experiences we are looking for:

- 5+ years of professional software development experience with Java platform
- Experience with JEE (Jboss, Hibernate, JMS, JPA, Spring)
- Knowledge or willingness to quickly learn Scala programming (Akka/Akka HTTP...)
- Experience with front end tooling, at least some of (React, Angular, Backbone, Ember) and HTML / CSS

Bonus points for:

- Solution architecture consultancy
- Experience with Java Web frameworks (i.e. spring, play)
- Experience working in Agile SCRUM teams
- Experience interacting, mentoring and troubleshooting in collaboration with other developers
- English proficiency (oral and written)
