

Front-End Developer

Deploy is a technology agency founded in 2008. in Austin, Texas. We work with agencies, start-ups and product company partners to deliver mission critical technology solutions.

Front-end developers build rich interactive experiences and are essential to making sure that the creative vision for an experience works seamlessly with back-end functionalities. The ideal candidate will have a strong appreciation for design and user experience and is excited by the challenges of building world-class applications and products.

We work with some of the most exciting brands, agencies and startups on the planet who ask us to push the boundaries of the browser. Are you ready?

Responsibilities:

- Creating sophisticated interfaces for in-browser applications using JavaScript, HTML and CSS

Qualifications:

- Experience with at least one of the listed frameworks/libraries: jQuery, AngularJS, ReactJS, EmberJS, Express,
- Experience with development of Single Page Applications with Javascript
- Current and detailed knowledge of browser peculiarities and how to work around them
- A constant desire to improve, learn more and make things better

Nice to have but not required:

- Strong visual design sense
- Experience with responsive / adaptive design
- Experience using source control systems like SVN and Git
- Experience with mobile development a plus but not required
- Bachelor's degree preferred but not required

Deploy is an equal opportunity employer (EEO)
